

Great Bios

The Great Biography Reading Group meets on Wednesday, **October 19th** in the Church library at 7:30pm. This time we shall talk about **Thomas Alva Edison**, almost like a neighbor in West Orange, NJ. **Edison** was an inventor and held patents on over a thousand inventions, a world record until recently. In the field of electricity, **Thomas Edison** is the man who flipped the switch. **Edison** can be called the great-grandfather of our iPod Nation. Surely he would like that because his greatest discovery was celebrity and the relation of celebrity to business. **Edison**, a businessman, surpassed military and political figures in public fascination - larger than life. Read whatever you find about **Thomas Edison** and join us in our discussion of a remarkable man and his imagination. (The November biography will be Joseph Rudyard Kipling.)
